

Bosisto's Euca Mulch

Applications and uses

- Public parks and green spaces
- Commercial landscaping projects
- Residential developments
- Roadsides, pathways, and nature strips
- Environmentally focused projects

Born from the rich heritage of Eucalyptus oil production in Inglewood, Victoria, Bosisto's Eucalyptus Mulch is a premium by-product of the steam-treated remnants of Eucalyptus foliage and stalks.

This unique mulch offers a fragrant, soft, and natural solution for landscaping projects, combining sustainability with exceptional performance in both commercial and residential gardens.

Key Features

Sustainably Produced: A by-product of Eucalyptus oil extraction, repurposing material that would otherwise go to waste.

Aromatic and Inviting: Non-toxic, with a refreshing Eucalyptus fragrance that enhances the aesthetic of large-scale projects while ensuring ease of application.

Sterilised and Clean: Naturally sterilised through steam treatment, ensuring it's free from weeds and pests.

Soft and Easy to Spread: Its fine texture makes it easy to distribute evenly, improving soil health, moisture retention, and temperature regulation.

Natural Finish: Provides an earthy, natural look, ideal for native gardens and landscape designs.

Benefits

Environmentally Friendly

Bosisto's Mulch aligns with sustainability goals, reducing landfill waste and reusing natural materials.

Cost-Effective Ground Cover

Long-lasting mulch that reduces the need for frequent replenishment.

Low Maintenance

Suppresses weeds, helps retain moisture, and regulates soil temperature, reducing watering and maintenance costs.

Aesthetic Appeal

Complements public and private landscapes with its natural, attractive finish.
